

Teknion Debuts New tn Storage & Accessories Collection

Oct 3, 2018 6:24 pm

Teknion has released its new tn Storage & Accessories Collection. The collection addresses new needs for personal storage and organization in today's workstation, providing a sleek and contemporary solution for the modern office.

Designed by [Toan Nguyen](#) with Teknion, the collection features a universal aesthetic that visually - and functionally - integrates with other pieces within the line. Its unique construction enables personalization through the choice of primary and secondary paint finishes on the collection's interior and exterior faces. tn also offers a choice of material inlays to cushion the contents.

Accessories include a small tray, long dish, tall dish, pencil tray and pen cup. A Rail Shelf integrates with standard accessory rails, and allows the smaller accessory pieces to sit on the shelf to offer different tiers of organization. It also acts as a modifier on the elements of the storage collection, which include a Desktop Optimizer, Mini Bag Drop and Bag Drop.
